

Workshop

'Statistical and dynamical models in biology and medicine'

October 11 – 12, 2012; University Stuttgart

This workshop intends to bring together researchers from different research areas such as bioinformatics, biostatistics and systems biology, who are interested in modeling and analysis of biological systems or in the development of statistical methods with applications in biology and medicine.

List of keynote speakers:

Marco Grzegorzcyk (TU Dortmund)
Thomas Höfer (DKFZ Heidelberg)
Hidde de Jong (INRIA, FRANCE)
Stéphane Robin (AgroParisTech, Paris)
