

An Invitation to Participate

INSC

2017

7TH INTERNATIONAL NONLINEAR SCIENCE CONFERENCE

Salzburg, Austria, April 6-8, 2017
at Paracelsus Medical University

The principal aim of the INSC is to provide a scholarly environment conducive to promoting exchanges among an array of disciplines to facilitate research and related academic and practical activities in collaboration with colleagues worldwide.

The topics covered by the conference include applications of nonlinear dynamics theory and techniques applied to problems encountered in any area of the behavioral, social and life sciences including psychology, sociology, education, economics, econophysics, management sciences, anthropology, art, biology, physiology, ecology, neurosciences and medicine.

Contributions from other disciplines such as computer science, mathematics and engineering are also welcome provided the main focus is an application of nonlinear science in the behavioral, social or biological sciences.
